

PROGRADE DIGITAL ANNOUNCES A HIGHER CAPACITY MICROSDXC UHS-II V60 512GB MEMORY CARD

*The microSDXC V60 512GB Enables You to Record an Extended Number of Video Clips
And Capture a Larger Number of Stills*

San Jose, CA April 11, 2024, 8:00 am PT —ProGrade Digital, Inc., founded with a mission to provide the highest quality professional grade digital memory cards and workflow solutions, announces its higher capacity microSDXC UHS-II V60 512GB memory card. Offering the same read speed of up to 250MB/s and write speed of up to 130MB/s as our other microSDXC V60 Gold memory cards, professionals can now capture even longer clips of high-resolution video and/or greater amounts of still images. ProGrade Digital SDXC UHS-II, U3, Class 10, V60 cards bring high performance to drones, action-cams, DSLRs, and mirrorless cameras, which produce incredibly rich data streams and require greater capacity from a memory card.

“The addition of a microSD, V60, 512GB capacity point, into our microSD product line, provides a nice capacity option for those shooting extraordinarily large amounts of 4K+ video and still images in traditional devices such as action and 360 cams, drones, nature cameras and now – even in the new iPhone 15 when mated to one of our ultra-portable PGM0.5 readers,” said Wes Brewer, founder, and CEO of ProGrade Digital. “Additionally, in conjunction with the introduction of the new Nikon Zf full frame and Canon Power Shot V10 vlogger cameras, we’ve also seen a dramatic increase in demand for our 256GB capacity microSD – spurring us to think ahead and release an even larger capacity point for this select group of professional users.”

ProGrade Digital microSDXC UHS-II V60 512GB, U3, Class 10 portfolio:

- Maximum read speed up to 250MB/s
- Burst write speed up to 130MB/s
- Minimum sustained write speed 60MB/s
- Capacity: 512GB
- MSRP: \$165.99

microSDXC V60 Delivers:

- High-performance speed verified to perform at a sustained read rate of up to 250MB/s
- Video tested and certified to perform at a minimum sustained recording rate of 60MB/s
- Recommended and tested in a wide range of drones, action-cams, DSLR, mirrorless cameras
- Optimized for 4K, UHD, Full HD, Motion JPEG, and most high bit rate MPEG-4 CODECS
- Laser etched unique serial numbering for the tracking of key components and manufacturing data for the highest quality control
- Full-size, full-speed, SD UHS-II adapter included

- Packaging: Biodegradable fiber tray
- Refresh Pro ready*
- 3-year warranty

About ProGrade Digital, Inc.

ProGrade Digital focuses exclusively on the design and marketing of digital memory cards, card readers, and workflow software required by imaging professionals. Flagship products include ProGrade Digital CFexpress™ and ProGrade Digital SDXC UHS-II V90 memory cards offered in a range of capacities and USB 4.0 and USB 3.1, Gen 2 high-speed readers. ProGrade Digital memory cards and workflow solutions are available for purchase globally through Amazon.com, on the company website, and also B&H Photo and Video.

*Refresh Pro™ functionality requires ProGrade Digital Refresh Pro™ software application and a ProGrade Digital card and reader. This is a great way to monitor card health and restore the card back to factory-fresh conditions.
