

## PROGRADE DIGITAL ANNOUNCES INGEST PRO SOFTWARE

*Ingest Pro Software Enables Videographers and Photographers to Streamline Their Data Management Workflow While Ensuring Their Memory Cards are Quickly Refreshed for Re-use in the Capture Environment*

**San Jose, CA April 12, 2024, 8:00 am PT** — ProGrade Digital, Inc., founded with a mission to provide the highest quality professional-grade digital memory cards and workflow solutions, is proud to announce Ingest Pro, a professional-grade software streamlining the way videographers and photographers process their media. Ingest Pro enables users to efficiently transfer, organize, create back-ups, manage metadata, verify file integrity, and much more! Ingest Pro is compatible with Windows and Mac OS devices. A free trial is available, and a full one-year subscription is only \$99. Ingest Pro will be available exclusively on our website beginning this quarter <https://shop.progradedigital.com/products/ingest-pro-software>.

“ProGrade Digital is expanding its offering of software applications with the introduction of Ingest Pro – built on a world-class platform developed in conjunction with Hedge,” said Wes Brewer, founder, and CEO of ProGrade Digital. “Ingest Pro allows professionals to manage large amounts of video and still image data by streamlining the ingest process, where memory cards are offloaded through ProGrade Digital readers into the editing environment. The management of large quantities of data requires a robust platform to quickly organize and index myriads of files while ensuring 100% integrity of the data after transfer. Ingest Pro provides this capability and includes proprietary functions, first introduced in our Refresh Pro utility, to maintain optimal memory card performance and health monitoring - all at a very attractive price point.”

### **Ingest Pro Software Key Features:**

- Effectively create copies, backups, and/or archive files
