

PROGRADE DIGITAL™ ANNOUNCES PRO MINI USB 4.0 SOLID STATE DRIVE

Streamline Your Workflow With The Compact High Performance PG10.5

San Jose, CA April 3, 2025, 8:00 am PT — ProGrade Digital™, founded with a mission to provide the highest quality professional grade digital memory cards, solid state drives, hubs, and workflow solutions, announces the PG10.5 Pro Mini SSD, available in 1TB, 2TB, and 4TB capacities. The PG10.5 Pro Mini SSD is based on the latest USB 4.0 technology, which is designed to achieve a maximum bus speed of up to 40Gbits/sec and provides a read speed of up to 4000MB/s, a write speed of up to 3500MB/s, and a sustained write speed of 1250MB/s. The PG10.5 is also equipped with ProGrade’s patented magnetic base and comes with an adhesive metal plate that allows users to mount the reader to any work surface or directly mount to the PG20 Pro Hub. The PG10.5 Pro Mini SSD ships with a high-quality certified USB 4.0 cable, assuring maximum performance possible.

“Our new PG10.5, Pro Mini SSD, allows imaging professionals to uniquely integrate high speed SSD storage into their desktop workspace, which includes the ProGrade PG20, Thunderbolt 4, 4 port hub. Leveraging the small physical size of the ProGrade workflow card readers and a patented magnetic base, the PG10.5 leverages a USB 4.0 interface that provides industry-leading read and write speeds – critical to high speed post-production editing and storage. The PG10.5’s small physical size and robust design also allow it to be easily removed from the workstation, studio environment, and easily used in more mobile, non-studio environments”, said Wes Brewer, CEO and founder of ProGrade Digital. It is available now for pre-order and will be shipping end of April.

ProGrade Digital USB 4.0 Pro Mini Solid State Drive Key Features:

- Read speed of up to 4000MB/s
- Write speed of up to 3500MB/s
- Sustained write speed of 1250MB/s
- USB 4.0 interface provides transfer rates of up to 40Gb/s (5GB/s)
- Compatible with Thunderbolt 4, Thunderbolt 3, USB 3.2, and 3.1 Type-C ports
- Patented magnetic base for solid drive stacking or workspace mounting with included adhesive metal plate
- Uniquely designed to integrate with the PG20, Thunderbolt 4 hub
